DETAILED ACTION

The following is an examiner's statement of reasons for allowance: The present invention is directed to an electro-acoustic device for creating patterns of particulate matter. Independent claims 1, 2, 13, 24 and 33-35 identify the uniquely distinct feature of a housing comprising one open end with a diaphragm across the open end and provide a close hollow interior and a transducer to excite the diaphragm and produce a pattern in a mass of particulate located on the diaphragm indicative of the audio signal in combination with all the disclosed limitations of claims 1, 2, 13, 24 and 33-35. The closest prior art, Jenny (3407897) discloses a device for rendering visible acoustic vibrations but fails to teach a diaphragm extending across the open end to close a hollow interior of the housing (See applicant's arguments submitted 12/11/08, page 11 last two paragraphs) and Charriere (FR 2308156A) discloses a device to transform audio signals into an optical image but fails to teach a diaphragm extending across the open end to close a hollow interior of the housing (See applicant's arguments submitted 12/11/08, page 14, paragraph 4). The prior art fails to anticipate or render the independent claims obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to BRIAN ENSEY whose telephone number is (571)272-7496. The examiner can normally be reached on Monday - Friday 6:00 AM - 2:30 PM.
